Frontend Developer

A self-taught developer enthusiastic and passionate for technology, music and creating new projects that started the studies at Udemy and recently got the Bachelor's in Frontend Development at the French university Openclassrooms.

Curious by nature, enjoy being involved in tasks that push me to do my best, challenge me to improve my skills and develop new ones. I believe in hard work, diversity of ideas and respect. I'm looking for a team where I can grow, learn and share knowledge.

Key Skills

- Good critic sense for organization and projects' design.
- Good learning curve as a self-taught.
- Solid knowledge in HTML, CSS, Sass, Styled-components, React, JavaScript, TypeScript, Material UI, React Testing Library, Jest, Git and Responsiveness.
- Improving knowledge in technologies such as Redux Toolkit, Nextjs, MySQL, Node, PostegreSQL, Cypress, Docker and Django.
- Studying AWS, DevOps and AI.

Carrier & Achievements

Frontend Developer, Loka, USA (remote)   **may 2022 - current**
- In this role I'm responsible for architecting and designing technical solutions for complex problems on the project: Currently I'm working on a banking web application for an American Credit Union. Tech used: HTML, CSS, Styled-components, Material UI, React, JavaScript, TypeScript, Redux Tool Kit, Jest, React Testing Library and Cypress.
- Among my responsibilities are making presentations of sprint deliveries to the clients and review colleagues code including juniors and seniors.
- In my current project I managed to implement a complex nav bar based on Notion menu behavior using recursive programming.
- As it's one of my main strengths, I proposed a way to standardize the application's responsiveness following good practices to cover the Figma breakpoints for the application to scale well.

Frontend Developer, Supernosso, Brazil (remote)   **ago 2020 – apr 2022**
- Performed maintenance, proposed improvements and developed new features in the e-commerce platform. Tech used: JavaScript, TypeScript, jQuery, ReactJS, HTML, CSS, Sass, Less and Vtex.
- Developed new features in Supernossoemcasa website.
- Participated of the whole redesign of Apoioentrega website improving the performance and UX.

Web Developer, Obrazul, Brazil   **mar 2020 – jul 2020**
- Developed and promoted implementations in the company's marketplace using technologies such as HTML, CSS, Sass, JavaScript, jQuery, Reactjs, Python, Django and PostegreSQL.
- Implemented and participated in the development of client's dashboard and the result report generator.
- Using of Git as code version control system and Trello for project tasks management.

Education

Bachelor's Front-end Developer, Openclassrooms, Portugal   **2018 - 2019**

Use best practices and technologies in order to structure the web and mobile such as HTML, CSS, ES6, Reactjs, WordPress, Bootstrap, PHPMyAdmin, SQL and Google API, guarantee the maintenance and growth of the web application, use tools to consult data base and store information.

Ignite Path Reactjs, Rocketseat, Brazil   **2022 - current**
Course focused in the web development of modern and reactive interfaces using ReactJS and other technologies such as: TypeScript, NextJS, React Query, Jest, Prismic, Chakra UI and more.

Postgraduation, Quality Engineering, Instituto Prominas   **2014 - 2015**
Specialization where the objective was to study methods of analysis and systems development to ensure that products or services are designed, developed and manufactured to meet or exceed customer requirements and expectations.

Bachelor's Science and Technology of Food, IF Sudeste de Minas   **2009 - 2012**
Graduation in which I developed qualitative and quantitative analytical skills following specific scientific methodologies in order to guarantee the best practices of food industry.
