Frontend Developer

Frontend Software Engineer with more than 5 years of experience delivering complex projects that are scalable, maintainable and with high performance. Focused on not just writing good code, but also delivering value to clients.

Strong skills in Javascript and its ecosystems. I built several projects from scratch to production for different clients such as Real State agencies, Supermarkets and Banks. Maintained and refactored legacy codebases for business with thousands of users.

Key Skills

- Good critic sense for organization and projects' design.
- Good learning curve as a self-taught.
- Solid knowledge in HTML, CSS, Sass, TailwindCSS, Styled-components, React, Nextjs, JavaScript, TypeScript, Material UI, React Testing Library, Playwright, Jest and Git.
- Improving knowledge in technologies such as Redux Toolkit, MySQL, Nodejs, PostegreSQL, Cypress, Docker and Django.
- Studying AWS and DevOps.
